V-4JC COMPOUND

RichardsApex has specialized in custom formulating evaporating oils and solvent based lubricants for many years. This series has gained wide acceptance where minimal lubricity is required and a controlled residual film is desired. **V-4JC** is a low viscosity oil that contains a non reactive extreme pressure agent.

BENEFITS:

- Near complete evaporation in hours
- Minimal residual film
- Contains no sulfur or chlorine
- Non reactive extreme pressure agent

RECOMMENDED USES:

- Slitting both ferrous and nonferrous thin gauge strip
- Drawing and stamping light gauge parts, ferrous and nonferrous
- Drawing ultra-fine wire, nonferrous and precious metals
- Lubricating film on insulated magnet wire

TYPICAL SPECIFICATIONS:

Specific Gravity	0.77
Viscosity @ 25C	2.1 cSt
Flash Point (TCC)	144F (62C)
